

Business Services

LawWave provides business and web application (software) development for small firms. We can develop office automation solutions specifically for your needs. Examples of business applications we have developed include automated mortgage documentation systems and billing calculation systems. Contact us now on 02 9715 1479 and talk to us about how we can automate office processes for you.

We also develop online applications and can roll out turnkey customer relationship management (CRM) systems or web content management systems (CMS) that allow you to easily update content. Applications such as stamp duty calculators and purchase and sale conveyancing quote systems allow your client new and innovative ways to interact with your website.
